

ALERT

Condoms in the Health Centre dispensers have been damaged and will not be effective.

If you have condoms from the Health Centre dispensers, **throw them away** due to the risk they may be damaged.

Puncture marks in Condom Packages

If you, or your partner, may have used a damaged condom please contact the Health Centre

519-797-3336

You may be at risk for:

- unplanned pregnancy
- sexually transmitted infections

Testing,
Counseling &
Support
Available

Condom Fact:
Always check the expiration date & make sure there aren't holes in the packaging before opening your condom — you should be able to feel a little air bubble when you squeeze the wrapper. If a condom is torn, dry, stiff, or sticky, throw it away.

Condoms greatly reduce the risk of unwanted pregnancies & sexually transmitted infections

For more information contact the Health Centre
