

TRAINING OPPORTUNITY LOOKING FOR 12 PARTICIPANTS!

4 WEEK HANDS-ON STRAW CLAY WORKSHOP

Straw clay is a natural, versatile building component which can be adapted to be used in small scale d.i.y. applications to full scale production projects. Tools, soil types, mixing techniques, building science, fibre selection - (straw as well as other aggregates will be taught) and production set ups from low tech to automated, will all be covered. After this four-week program, you will have all the skills necessary to produce this wall system for your own projects or others - while making a significant contribution to the construction of an essential building in the community!

This program is open to Saugeen Membership only and will run for 4 consecutive weeks beginning August 10th and ending September 5th. Work week will be Monday to Friday 9:00am to 4:30pm, lunch to be provided daily. Need to be willing to commit for the entire 4-week program. We look forward to seeing you!
