

Saugeen First Nation Weekly Vaccine Update

VACCINATION STATISTICS AS OF MONDAY, NOV. 1ST

- 72% of the reserve's population has received their first dose
 - 66% of the reserve's population has received their second dose
- These numbers have been adjusted to account for the vaccine administration error that occurred within the community**

Please note: the purpose of the vaccine is to prevent against infection and decrease the chance of severe illness/death from occurring. However, vaccinated individuals can still contract COVID-19 in breakthrough cases and spread it to others. Please continue to follow COVID-19 safety precautions. Miigwetch.

VACCINATION CLINIC'S HAPPENING THIS WEEK

Thursday November 4th, at the Mino Bimaadsawin Health Centre
from 11am-4pm
